BIO

Danish born, based in London.

Flemming has experience shooting from stage - to location. He has lensed theatrical released Feature Films, TV commercials and has a history in Music Videos and award winning Short Films. He's now starting in TV Drama.

Flemming's process is to light & lens from an emotional POV, a feeling that relates to the story rather than from a technical 'perfect' place, this often increase the workflow which gives the actors freedom to find their performance within the space.

Flemming is frugal with the equipment & plan for spontaneity, a refined kit list is paramount. Being nimble helps everyone, not just budget but the director in turn around time.
